To whom it may concern

We hereby declare that the SureFeed Sealed pet bowl (model number SPB) does not use any encryption algorithms in its operation. The product has no Data storage or radio transceiver functions.

The products function is a Pet food bowl with an automatic cover to restrict access to the food to times when the pet is present. The Sealed Pet bowl cover is opened when the animal's presence is detected via the infra-red detectors mounted on the product. The cover then closes a short time after the pet leaves the proximity of the bowl.
